

## Biology laboratory technician / research associate (80-100%)

Polyneuron Pharmaceuticals AG is committed to the development of a promising new drug class to treat rare autoimmune disorders. The Swiss Biotech Startup is looking for a biology laboratory technician / research associate to complement its small dynamic team. The position is open per **March 01, 2018** or as agreed.

### Main responsibilities

The focus of our research and development is in the field of autoimmune diseases of the peripheral nervous system and the laboratory technician / research associate will perform *in vitro* and *in vivo* immunological studies to support the pre-clinical research and development of new drug candidates. The work involves e.g.

- Cell culture work
- Support of the development of *in vitro* and *in vivo* models
- Application of drug candidates *in vivo*
- Validates of drug candidates *in vitro* and *in vivo*
- Support of technical activities of co-workers
- Compiling of results and writing of reports
- Support of day-to-day organizational aspects in the laboratory

### We are looking for

- Vocational education as a biology laboratory technician or University degree in Biology or related field
- Experience working with cell lines and preferably also with primary human cells
- Experience working with laboratory animals (FELASA B/LTK1)
- A responsible team player with the ability to communicate to all levels in the organization
- Ability to work independently
- Willingness to learn new techniques
- Experience working with MS-Office-Programme (Word, Excel)
- Good written and verbal communication in German and English

### We offer

We are offering a pleasant working atmosphere in a small and international team. We offer you to gain insights into the pre-clinical and clinical drug development processes during your interesting and diversified job. We are happy to receive your complete application by e-mail (Dr. Delphine Demeestere ([d.demeestere@polyneuron.com](mailto:d.demeestere@polyneuron.com))).
